APRIL SUB-STATE PRESS RELEASE

For Immediate Release May 22, 2018

Slight Employment Increase Persists in Nevada Metro Areas as State's Industry Growth Continues

CARSON CITY, NV – According to the Department of Employment, Training and Rehabilitation's (DETR) April 2018 economic report, job growth continued throughout the Silver State in April with slight increases in employment in all three metropolitan areas. Year-over-year employment increase persists in the State as a whole, while unemployment remained constant at 4.9%.

"This latest data shows the economic consistency in the labor force statewide released last week, with that growth distributed throughout the state. While this growth was fastest in Reno at 4.2 percent, Las Vegas still added over 29,000 jobs over the year with growth in manufacturing and construction industries. Unemployment continues to show improvement, with the unemployment rate down in 12 of 17 counties and initial claims for unemployment benefits down in 13 of 17 counties over the year," said David Schmidt, Chief Economist, for Nevada's Department of Employment, Training & Rehabilitation.

Additional April 2018 Economic Report Highlights:

- Job Growth In April (Seasonally-Adjusted):
 - Las Vegas gained 1,600 jobs over the month and 30,500 over the year (3.2 percent).
 - o Reno added 800 jobs over the month and 9,500 over the year (4.1 percent).
 - o Carson City was up 800 jobs over the year (2.7 percent).
- Unemployment:
 - o Las Vegas: five percent; down 0.3 percentage point from a year ago
 - o Reno: 3.9 percent; down 0.4 percentage point from a year ago
 - o Carson City: 5.2 percent; down 0.1 percentage point from a year ago
 - April unemployment rates ranged from 2.9 percent (Eureka) to six percent (Lyon).
 - Elko, Eureka, Humboldt, and Washoe counties all had unemployment rates below four percent, the lowest such rates in the state.
- Las Vegas and Reno continue to realize record highs in employment.
- Information for 2016 shows personal income in Nevada reached \$119 billion, up 1.7 percent from a year ago.
- Las Vegas (up 2.3 percent) and Reno's (up 1.9 percent) average personal income growth has exceeded that for the State in 2016.
- The Reno-Sparks area was the top goods exporter in Nevada in 2016, shipping \$2.4 billion worth of goods abroad.
- Washoe (+3,000) experienced the largest increase in job posting volume over last year, totaling 15,200 ads year-to-date.

-###-

ABOUT THE RESEARCH AND ANALYSIS BUREAU

The Research and Analysis Bureau is Nevada's premier source for labor market information. A part of DETR, the Bureau is responsible for creating, analyzing, and reporting Nevada's labor market information, in cooperation with the United States Bureau of Labor Statistics (BLS).

Visit us http://www.nevadaworkforce.com and Follow us on Twitter: http://www.twitter.com/NVlabormarket

DETR is comprised of the Employment Security Division, Equal Rights Commission, Rehabilitation Division, and the Research and Analysis Bureau. DETR oversees the Nevada JobConnect System to provide training and job placement services to job seekers and to assist employers in hiring practices. It also supports economic development efforts through improving Nevada's workforce.

NEVADA SUB-STATE LABOR MARKET OVERVIEW

April 2018

Statewide, seasonally adjusted employment increased by 4,300 jobs in April, relative to March. As for Nevada's major population centers, mixed gains were realized this month. Las Vegas employment saw a seasonally-adjusted increase of 1,600 jobs, the result of increasing by 6,100 jobs when only 4,500 were expected

to be added. Reno employment realized a seasonally-adjusted increase of 800 jobs, the result of increasing by 2,400 jobs when 1,600 were expected to be gained. Carson

| Nevada Nonfarm Jobs: March - April Change | | | | | | | | | | |
|---|---------------|----------|----------|--|--|--|--|--|--|--|
| | Expected Seas | | | | | | | | | |
| | Unadjusted | Seasonal | Adjusted | | | | | | | |
| | Change | Movement | Change | | | | | | | |
| Las Vegas | 6,100 | 4,500 | 1,600 | | | | | | | |
| Reno | 2,400 | 1,600 | 800 | | | | | | | |
| Carson City | 200 | 300 | -100 | | | | | | | |

City saw a seasonally-adjusted decrease of 100 jobs, the result of increasing by only 200 jobs when 300 were expected to be added.

Year-over-year employment increased in the

State as a whole and in all metropolitan statistical areas (MSAs) this month. Statewide, job growth was strong and increased by 3.4 percent, which correlates to 45,300 new jobs added since April of last year. In Las Vegas, jobs have increased by 30,500 year over year, which correlates to a growth rate of 3.2 percent. Specifically, goods-producing industries added 8,600 jobs to payrolls while service-providing industries added 20,700¹. In Reno, 9,500 jobs were added over the

¹ References to total MSA employment are adjusted for seasonality, whereas references to goods-producing and service-providing industries are not.

year, translating to a growth rate of 4.1 percent. That area saw an increase of 3,700 goods-producing jobs and 6,000 service-providing jobs. In Carson City, 800 jobs were added relative to last year, resulting in a growth rate of 2.7 percent. That area saw an increase of 400 goods-producing jobs and 400 service-providing jobs.

The Bureau of Economic Analysis (BEA) provides us with a measure of real personal income (chained 2009 dollars). Personal income is the income received by all persons from all sources: net earnings, property income,

and personal current transfer receipts. It is one of the broadest measures of economic activity at the State and sub-State levels.

Information for 2016 shows personal income in Nevada reached \$119 billion, up 1.7 percent from a year ago. The Silver State's two largest metropolitan areas, Las Vegas and Reno, have both experienced increases over this period.

Las Vegas and Reno's average personal income growth has exceeded that for the State in 2016. The Las Vegas area's

personal income is up 2.3 percent from 2015, totaling \$84 million. The Reno area's personal income growth is up 1.9 percent from 2015, reaching \$20 million.

Carson City was the only MSA to realize an over the year decline in personal income in 2016. That area's personal income declined by 1.5 percent, totaling two million dollars.

The International Trade Administration Metropolitan Export Series contains data on merchandise trade exports to the world from Nevada's MSAs.

The Reno-Sparks area was the top goods ex-

porter in Nevada in 2016, shipping \$2.4 billion worth of goods abroad. The area's top export sector was computer/electronic product manufacturing (51.2 percent of exports). The Reno-Sparks area has been growing steadily since 2005 with a slight decline in 2015 exports.

The other major metro area exporter was Las Vegas-Henderson-Paradise, shipping exports valued at \$2.3 billion abroad. The area's top export sector in 2016 was miscellaneous manufacturing (40.1 percent of exports). Las Vegas saw

a significant decline in exports in miscellaneous manufacturing in 2016. Las Vegas has struggled to regain miscellaneous manufacturing jobs from its pre-recessionary peak, explaining the decline of exports seen in that industry.

In 2016, Carson City shipped \$1.28 million in exports and the area's top export sector was transportation equipment manufacturing (26.2 percent of exports). Since 2005, Carson City has been relatively slow in terms of growth.

Unemployment rates decreased in all of the State's major population centers on a month-over-month and year-over-year² basis in April. In Las Vegas

the unemployment rate is at five percent, down 0.1 percentage point from March, and down 0.3 percentage point from April last year. Reno's unemployment rate is at 3.9 Unemployment Insurance Initial Claims By County

| | April | 2018 | |

*County level totals are not directly comparable to Statewide monthly totals due to reporting differences.

percent, down 0.3 percentage point from March, and down 0.4 percentage point from this time last year. The unemployment rate in Carson City is at 5.2 percent, down 0.5 percentage point from March, and down 0.1 percentage point from April last year.

Unemployment rates declined on an over-the-year basis in 12 of 17 counties this month. Rate declines ranged from 0.1 percentage point (White and Carson City) to 0.7 percentage point (Nye). Esmeralda realized the largest rate increase of 0.9 percentage point this month. All counties remain at or below six percent unemployment in April with 12 counties below five percent. Eureka, at 2.9 percent, is home to the State's lowest unemployment rate. Elko, Humboldt, and Washoe (all below four percent) also maintain relatively low unemployment rates. Lyon, at six percent, has the highest unemployment rate in the Silver State this month.

Statewide, initial claims for Unemployment Insurance (UI) benefits were down

² The State's seasonally adjusted unemployment rate is 4.9 percent inApril, unchanged from March and down from 5.1 percent in April 2017. Unemployment rates for the State's metropolitan areas and counties reported here are not adjusted for seasonality. Hence, comparisons to the State's seasonally adjusted rate should be avoided. Legitimate comparisons, however, can be made to the State's unadjusted rate - 4.8 percent in April, down from five percent in March and down from 5.1 percent in April 2017.

5.4 percent through the first four months of the year, when compared to the same period last year. This has elicited declines in 13 of Nevada's 17 counties. Of Nevada's three largest counties, Clark County experienced the largest nominal decline, with a decrease of 1,100 claims, or three percent. Washoe County saw the largest percentage decline in claims activity, down 13 percent, with a decrease of just over 900 claims over the year. Carson City, the State's smallest metropolitan statistical area, held steady this month.

Douglas County realized a decline of just over 140 claims, for a decrease of nearly 23 percent. That area realized the largest decrease in claims out of all of Nevada's micropolitan statistical areas. The only county to experience a significant increase in initial claims was Pershing, with just over ten more initial claims through April. Four of Nevada's smaller counties held steady this month, including Esmeralda, Eureka, Mineral, and Lander.

Year-to-date online job posting activity is down in 13 of 17 counties in April³. Washoe (+3,000) experienced the largest increase in ad volume over last year, totaling 15,200 ads year-to-date. This gain is likely the result of a ramp-up in hiring at the Tahoe Regional Industrial Center, a large industrial park nearby. Clark has seen the second largest increase in ad volume over last year (+900), totaling 50,300 ads year-to-date. Nye (+20) and Eureka (+20) are the only other counties who saw increases in ad volume over last year this month. Carson City has realized the largest decrease of ads (-900) over last year, totaling 2,500 ads through April of this year. Despite job posting volume being down in many of Nevada's smaller counties, Statewide posting activity is up over the year and continues to show improvement.

³ Online job postings are obtained through DETR's Silver State Solutions initiative. Online job posting volume does not necessarily correlate with the level of job openings or hiring. Internal company hiring and union hiring are often not captured by online ads. High ad volume often occurs for occupations/industries that are having difficulty finding qualified candidates, high turnover positions/recurring openings, or when companies are building large candidate pools. Online job postings should only be used with caution when developing/analyzing time series trends due to the constant changes in the rate of online advertising usage and in the methods used for collecting the data.

Nevada Sub-State Labor Market Briefing: April 2018

Special Topics

Reno-Sparks Top Goods Exporter in Nevada in 2016

The Reno-Sparks area's top export sector: computer/electronic product manufacturing (51.2% of exports)

The Las Vegas area's top export sector: miscellaneous manufacturing (40.1% of exports)

Carson City's top export sector: transportation equipment manufacturing (26.2% percent of exports)

Personal Income on the Rise in Nevada's Largest Metropolitan Areas

In 2016, personal income in Nevada reached \$119 billion, up 1.7 percent from a year ago.

Las Vegas average personal income growth up 2.3 percent from a year ago. 2016 totals reached 84 million.

Reno average personal up 1.9 percent from a year ago. 2016 totals reached 20 million.

Carson City personal income growth has declined 1.5 percent from a year ago.
