STATEWIDE PRESS RELEASE

For Immediate Release
December 17, 2020

Nevada adds jobs back in November; unemployment rate continues to improve

CARSON CITY, NV - Employment in Nevada increased over the month by 9,200 jobs as the State continues to recover. Jobs remain below typical levels; Nevada has 109,500 fewer jobs than in November 2019, for an annual job growth rate of -7.7% according to the Nevada Department of Employment, Training and Rehabilitation's (DETR) November 2020 economic report. The total employment level in the State is 1,317,800. The state's unemployment rate in November is 10.1 percent, an improvement from 11.9 in October but 6.4 percentage points higher when compared to November 2019.

"I'm encouraged to see that Nevada is continuing to add back jobs," Director Elisa Cafferata said.

DETR's report also notes that Nevada's Unemployment Insurance (UI) initial claims decreased by 5,278 or 13.9% over the month, to 32,613 claims. This is the fewest claims filed in a month since the beginning of the pandemic.

"This month Nevada continued to experience a rebound in employment and unemployment, on par with the trend since August. Employment rose by 9,200 jobs while the unemployment rate fell to just over 10 percent. Of particular note among industry employment figures are the nondurable goods manufacturing industry, which rose to its all-time high in November and the full-service restaurant industry, which returned to pre-COVID levels over the last two months. Retail and wholesale trade saw stronger increases in employment than normal seasonal patterns, while accommodation saw sharper declines than normal," said David Schmidt, Chief Economist for DETR.

Additional November Economic Report Highlights:

- Nevada jobs are up by (+0.7%), US jobs are up by (+0.2%) from October to November.
- Trade, Transportation, & Utilities added the most jobs (+4,900) over the month.
- Management of companies and enterprises (-20.1%) and educational services (-16.2%) are down the most since the same time last year.
- The unemployment rate in Nevada is higher than the national rate in November and is at 10.1% on a seasonally adjusted basis and 9.9% on an unadjusted basis; the national rate was 6.7% adjusted and 6.4% unadjusted.

###

ABOUT THE RESEARCH AND ANALYSIS BUREAU:

The Research and Analysis Bureau is Nevada's premier source for labor market information. A part of DETR, the Bureau is responsible for creating, analyzing, and reporting Nevada's labor market information, in cooperation with the United States Bureau of Labor Statistics (BLS).

Nevada Statewide Labor Market Overview

November 2020

Published on December 17, 2020

In this release, we provide updates on our primary employment, unemployment, and unemployment insurance programs. This month's report continues to show the impact of COVID-19 on Nevada's labor market. Employment realized a stronger increase over the month than seen in the past two months. Trade, transportation, & utilities added the most jobs over the month, surpassing pre-pandemic employment levels as large ecommerce companies ramp up hiring for the holiday season. While this news is positive, it is important to note that trade, transportation, & utilities (which includes retail trade) typically adds the most seasonal jobs in November to support consumer spending during the holidays, meaning employment levels in these industries are susceptible to a decline after the holiday season. Additionally, the non-durable goods manufacturing sector added jobs over the month and is at a record high employment level. Non-durable goods manufacturing includes companies that produce items such as toilet paper, other plastic products, and pharmaceutical preparation products. Non-durable goods manufacturing has helped support constituent behavior and needs during the pandemic which can, in part, help explain the increase in growth realized in this sector. Finally, it's important to note that while full-service restaurants saw decrease in employment over the month, that industry's employment levels have surpassed pre-pandemic levels, despite undergoing policy restrictions and a change in consumer habits during the pandemic.

Turning to unemployment, the employment growth see over the month was reflected in the unemployment rate which improved in November for the seventh consecutive month. Additionally, the number of people filing for unemployment insurance claims realized a decline from last month. Although the labor market continues to improve, Nevada remains one of the states most impacted by the COVID-19 pandemic. A new wave of virus cases and further policy restrictions are likely to limit prospects for sustained growth in the near term.

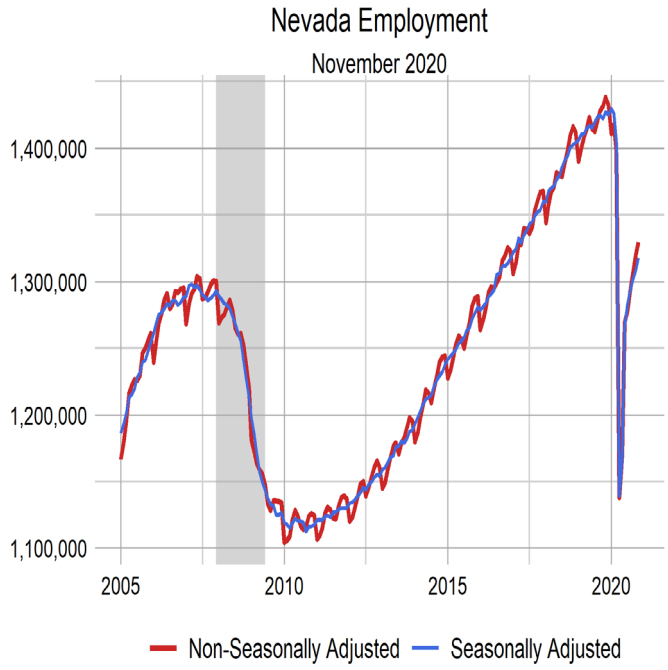
Information on how to file an unemployment insurance or pandemic unemployment assistance claim, where to get updates from DETR, or what other services are available from the department can be found at the end of this write-up. Additional labor market information can be found on our website (http://nevadaworkforce.com/).

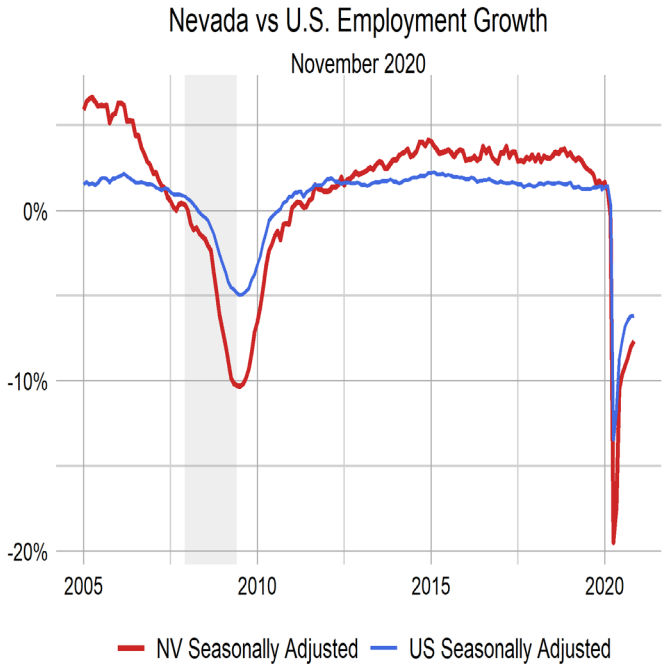
Current Employment Statistics (CES)

Estimates for this section come from the Current Employment Statistics (CES) program sponsored by the Bureau of Labor statistics (BLS). Total nonfarm employment realized an increase of 9,200 jobs from October 2020 to November 2020, a growth rate of 0.7%. Since November 2019 total nonfarm employment saw a decrease of 109,500 jobs, or -7.7%. The largest employment increases in November 2020 occurred in trade, transportation, & utilities, financial activities, and professional & business services.

For more information visit our CES Page, see the summary tables at the end of the document, or check out our dashboards for a CES summary or industry estimates.

More summary information on Nevada's Labor Market and the U.S. Labor Market.





Adjusted Current Employment Statistics
November 2020

Area	November 2020 2020	October 2020 2020	Monthly Change	November 2019	Yearly Change	Annual Growth Rate
U.S.	142,629,000	142,384,000	245,000	151,998,000	-9,369,000	-6.16%
Nevada	1,317,800	1,308,600	9,200	1,427,300	-109,500	-7.67%

Unadjusted Current Employment Statistics

Area	November 2020 2020	October 2020 2020	Monthly Change	November 2019	Yearly Change	Annual Growth Rate
U.S.	144,005,000	143,488,000	517,000	152,929,000	-8,924,000	-5.84%
Nevada	1,329,500	1,320,500	9,000	1,438,100	-108,600	-7.55%

Local Area Unemployment Statistics (LAUS)

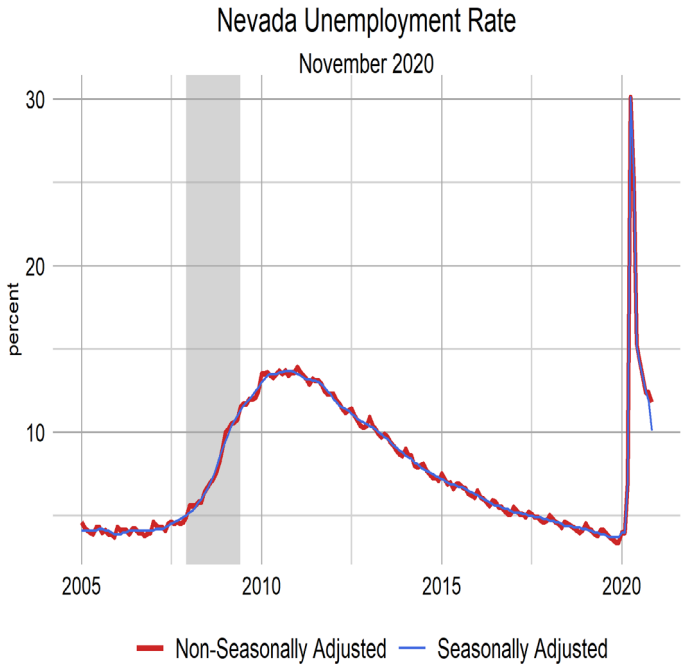
Figures for our unemployment estimates come from the Local Area Unemployment Statistics (LAUS) program sponsored by the (BLS). The state's unemployment rate is 10.1 percent this month, down -1.8 percentage point from October 2020 and up 6.4 percentage point when compared to November 2019. Unemployment totaled 153,379, down 31,143 from October 2020 and up 96,347 from November 2019.

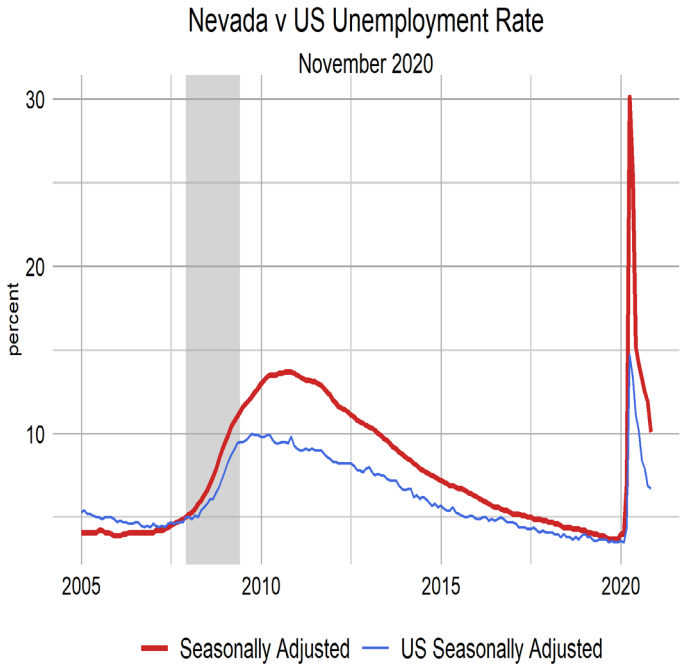
Visit our LAUS page for more information, see the summary tables for industry summaries by area, or check out our dashboard for a look at each area.

Adjusted Local Area Unemployment Statistics

November 2020

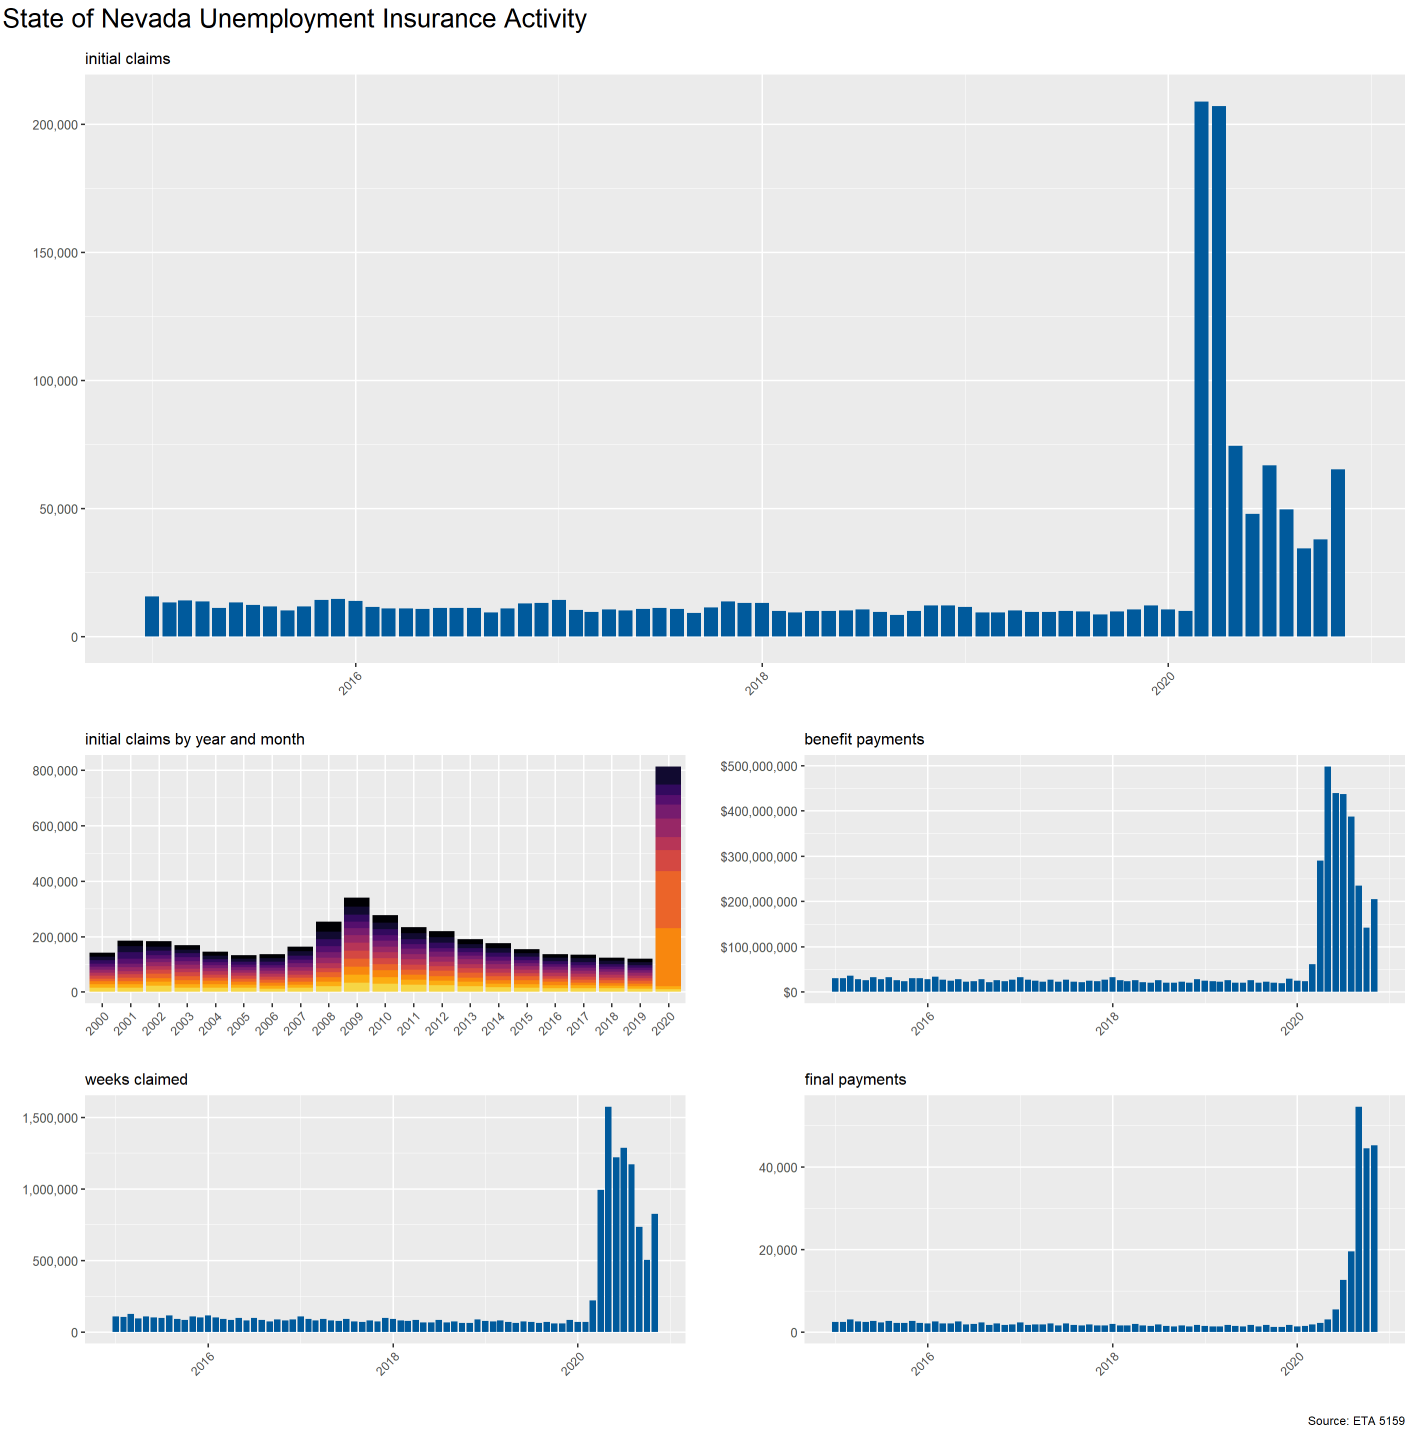
Area	Labor Force	Employed	Unemployed	Unemployment Rate	Labor Force Participation Rate	Employment Population Ratio
Nevada	1,512,859	1,359,480	153,379	10.1	60.7	54.5





Unemployment Insurance Benefits (UI)

In November, 32,613 initial claims for regular unemployment insurance were filed in the State of Nevada, a decline of 5,278 claims, or 13.9 percent, from a month ago when there were 37,891 claims. This is fewest claims filed in month since the beginning of the pandemic, but would be amongst the state's worst months in history in any other year.



With a majority of claimants now receiving benefits from the benefit extension programs, activity for Nevada's regular program has seen some rather significant declines. Measures such as weeks claimed, weeks compensated, and final payments have all seen month-over-month declines of 20 percent or greater in recent months. While it is good to see improvement in these areas, most of the decline in activity is from claimants exhausting benefits.

A concern moving forward is the expiration of the Pandemic Emergency Unemployment Compensation (PEUC), which is currently set to end the week ending December 26th. Nearly 100,000 claimants are currently filing under the PEUC program and would be moved into to the state extended benefit program should no changes be made by Congress.

November 2020 Unemployment Insurance Activity

Measure	November 2020	November 2020	November 2019	November 2019	% change	October 2020

Nevada's Unemployment Insurance Trust Fund held a balance of $4.3 million as of the week ending December 12th. With benefit outflows still elevated, the state, after nine months of unprecedented benefit payment levels, will begin borrowing from the federal government to support regular benefit payments. As of December 10th, twenty-one states and territories have needed to borrow from the federal government to support benefit payments, totaling $44.1 billion in borrowing.

Nevada Unemployment Services Available

DETR serves all Nevada citizens by being the State's lead workforce development agency. DETR consists of divisions that offer workforce related services, job placement and training, services for people with disabilities, investigation of claims of discrimination, unemployment insurance benefits, and labor market data.

For current updates from the department and to find resources available, please visit:

https://detr.nv.gov/coronavirus.

To file an unemployment insurance claim or for additional information, please visit http://ui.nv.gov/

To file a claim for PUA or for more information, please visit:

https://detr.nv.gov/pua

Additionally, a document that summarizes of all DETR services has been added to our website at http://nevadaworkforce.com/.
